

FAST & LIGHT® SERIES

Maximum space, minimum weight. MSR Fast & Light tents take livability elbow room. Plus, they're durable enough for late-summer cloudbursts, A

NEW!

CARBON REFLEX 1

The Reflex 1P is the lightest double wall tent we've ever made. It provides ample room for living with exceptional features and is incredibly light weight.

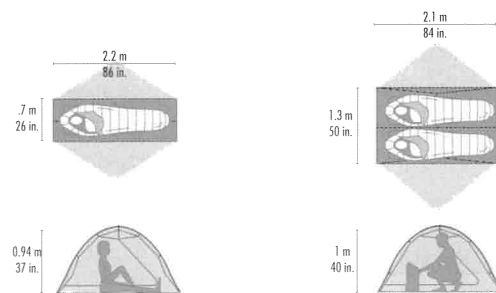

- **Hyperlight:** Comparable to the Hubba tents in volume, carbon fiber poles and efficient design shave nearly a pound from corresponding pack weight.
- **Fast Setup:** Efficient, two-pole design makes setting up this non-freestanding tent quick and easy.
- **Livable:** Unique geometry provides maximum interior space, roomy front vestibule and zippered rear window access to rear vestibule.
- **Versatile:** Can be set up as a double-wall tent or with just fly and footprint for a compact, fly-weight shelter at just .70kg (1lb 9oz).

NEW!

CARBON REFLEX 2

This is the lightest two-person double wall tent we've ever made. It provides full-featured room for two at the weight of many one-person tents.

- **Hyperlight:** Comparable to the Hubba Hubba tent in volume, carbon fiber poles and efficient design shave nearly a pound from pack weight.
- **Livable:** Unique pole configuration provides maximum interior space, roomy front vestibule and zippered rear window access to rear vestibule.
- **Fast Setup:** Efficient, two pole design makes setting up this non-freestanding tent quick and easy.
- **Versatile:** Can be set up as a double-wall tent or with just fly and footprint for a compact, fly-weight shelter at just .90kg (2 lbs).
